PRIVATE SALE OF FARM PROPERTY

PURSUANT to the directions of the Registrar, offers will be received by the undersigned up to the 31st day of March A. D. 1922, for the purchase of the West half of Section Seventeen (17) in Township Thirty-two (32) Range Five (5) West of the Fourth Meridian, containing Three Hundred and Twenty (320) acres more or less. Reserving unto the Crown all mines and minerals and subject to the reservations contained in the existing Certificate of Title for the said land.

FOR FURTHER PARTICULARS, terms and conditions of sale apply to MESSRS. GRIE-BACH, O'CONNOR & COMPANY, Barristers,
10072 Jasper Avenue,
Edmonton, Alberta.

Approved:
W. Forbes
Registrar

Stonelaw U. F. A.

A meeting of the Local will be held in the Minor School on Saturday afternoon, Feb. 18th, at 1 o'clock.

Just a word to the members who wish to make these afternoon meetings a success: "Turn out as strong as you can, and remember that the U. F. A. is going to be the means of solving your problems better than any other organization in this Province.

Thos. Partridge, Secy.

This Local has to buy some Oats, and we don't want to send away for some unless we have to. We are willing to give the farmers the same price as it would cost us to ship them in. If you have any oats for sale come to our meeting, on Saturday, and get acquainted. If you cannot come leave word at the News Office or communicate direct with T. Partridge, Secy., or S. W. Hjelle, Treas.

FOR SALE

Two white Coyote Hounds, 2 years old, and guaranteed to kill.
Apply to A. Grace

NOTICE

If you have any cattle or hogs to sell, see me. Will buy at any time.
H. McCarron

COMING EVENT

The St. Laurence W. A. are presenting a Comedy, in three acts, "Terms Cash, Invariably in Advance," on Friday, Feb. 24th, at 8.30 p. m. in the Big Hall.

The play is very humorous and will provide a full evening's entertainment. Twelve characters take part. See posters.

Admission: Adults \$1, Children, under 12, 25c.

Sunday School Festival

The first of a number of Sunday School Festivals will be held (D. V.) in St. Laurence Church on Sunday, Feb. 26th, at 11 a. m. An address will be given and Holy Communion will be celebrated.

It is hoped that as many parents and friends as possible will be present, especially those who are unable to come to the ordinary Evening Services.

School Fair Meeting

There will be a meeting of the School Fair Committee in the Monitor Schoolhouse at 3 p. m. on Saturday, Feb. 25th. Stonelaw, Horse Show and Hillvale, P. A. S., U. G. G., Board of Trade, and each of the School Boards are supposed to send delegates.

Please select the ones most interested as important business is to come before this meeting.

W. F. Hargrove, Pres.

The St. Valentine's Social evening held in the Cooperative Church was an indisputable success. The Church building was artistically decorated by some of the senior girls of the school. The evening was spent in a series of very enjoyable social games. A programme of selective readings was given during the evening and the contents of the customary Cupid's Post Office Box were distributed. The event was concluded by a splendid lunch.

Alex and Mrs. MacDonald returned home, on Tuesday, after a lengthy visit down in Ontario.

Chester Duncan is spending a few days at Monitor.

HOCKEY MATCH A DRAW

Although it was about 15 below zero, on Tuesday night, a goodly number braved the cold to witness the hockey game between Coronation and the local team. Special lights were put up so that the match could be pulled off at night as owing to the train service the visitors could not play here during the daytime.

A clean, fast game was played, Coronation scoring the first count which was soon equalled when Gilman rushed up the ice and scored on an individual play. Each team scored again before the period ended, making it two all. No counts were chalked up in the second period although both goalkeepers were kept busy turning aside the puck. More pep was injected into the final period and some fast hockey resulted, each team bulging the nets for a counter. Duncan and Wallace furnished a little excitement, when they came to blows, and were put on the fence for two minutes.

Although the score was tied at the end of the regular time, Coronation absolutely refused to play any overtime to break the tie and the game ended 3 all. Clendenning scored twice for the locals.

Coronation—	Monitor—
Ward	Goal—McCulloch
Doughty	Defense—
Wallace	Clendenning
	Duncan
H. Short	Forwards—
Hunt	McGinn
McLean	Gray

Local Happenings

A. Woodrow returned home on Saturday, after a visit to Gilby, Alta.

Dudley McIntyre returned from Calgary, last week, after spending several months in the city.

A. L. Todd is convalescing after an attack of malaria.

M. J. and Mrs. Sullivan arrived home on Friday from their honeymoon trip.

W. A. DeWolfe, of the Consort Enterprise, spent a couple of days in town last week, and paid the News a fraternal visit.

The Rev. W. S. Wickenden will give a Lantern Lecture (D. V.) in Basin Lake School on Friday evening next, at 8 p. m. All welcome.

James Taylor, of the Bank staff, visited up at Edmonton and Tofield last week.

A good sized crowd came down from Coronation, Consort and Loyalist, on Tuesday night, to attend the hockey match and dance.

Another cold snap paid us a rather unwelcome visit this week, the mercury dropping down to 35 below, on Monday.

The Dominion Cafe has gone out of business, having closed its doors last week.

A very pretty wedding took place at the home of James A. Anderson, of Gilby Alta., on Monday Jan. 30th, when their second daughter, Florence Lucille, was united in marriage to Morris Irvin Sullivan, of Monitor Alta. After the wedding dinner the bride and groom left for Calgary, en route to their new home.

Rev. D. Simpson, Methodist Minister of Rimbey, officiated.

Few people realize that 20, 445 Canadian ex-service men have been established on the land and are nearly all making good; that Canada's water-power development represents an investment of \$475,000,000, while the power produced would otherwise require 18,000, 000 tons of coal yearly; or that nearly 88 per cent of the world's supply of asbestos comes from the Province of Quebec. The Natural Resources Intelligence Branch of the Department of the Interior has just issued a revised edition of "Concise Facts," which contains a concise form information regarding Canada, its area, population, trade and industries, their extent, capital invested, wages paid, value of live stock, principal crops and amounts produced; mineral resources and production, also forest resources and forest products. Copies of the booklet are available on application to the Superintendent, Natural Resources Branch, Department of the Interior Ottawa.

ROYAL YEAST CAKES

Canadian Made

As a health builder, Royal Yeast is gaining in popularity every day. It is a food - not a medicine. It supplies the vitamins which the diet may lack. Royal Yeast is highly beneficial in cases where the system seems "run down". Royal Yeast is the richest known source of vitamins, and when taken into the system acts as a corrective agent. Royal Yeast Cakes are recommended for their purity and wholesomeness. It is the purest, the most convenient and economical yeast on the market.

Two to four Royal Yeast Cakes a day will work wonders. A full day's supply can easily be prepared at one time by using one glass lukewarm water and teaspoon sugar to each yeast cake. Allow to stand over night in moderately warm room. In the morning stir well and pour off liquid. Place in refrigerator or other cool place and drink at intervals as desired throughout the day.

Send name and address for free booklet "Royal Yeast Cakes for Better Health."

EW GILLET COMPANY LIMITED
WINNIPEG, TORONTO, CANADA, MONTREAL.

Canada's Needs

No. 6—Scientific Research (Continued)

Admitting that Canada has been backward in the prosecution of scientific research, and granting that an effort should now be made to overtake the loss occasioned by past neglect, the question arises what is to be done and how?

No Government should be expected to bear all the cost of discovering new scientific truths; that of course is paternalism. Most of the cost of this work must be left to private enterprise since it is by private enterprise that the new knowledge will be exploited, properties laid out, employees set to work, and production carried on.

But if every branch of Canadian enterprise starts independently in the pursuit of new scientific information, there is bound to be tremendous waste. Many duplicate laboratories would be required. Much overlapping of effort would go on. In one laboratory time would be lost in proving or disproving what had already been learned in a laboratory somewhere else—and perfectly willing to share the knowledge.

A vast amount of energy and money would be wasted on ground work—instead of having the ground work done as far as possible in common and the money available for research concentrated on the really new effort. To discover a quite simple formula might cost so much for laboratory and men as to discourage the enterprise.

A lack of organization would be, therefore, a drag on the wheel. It has been suggested in such circumstances that the universities should be mobilized. But this view has had to be abandoned, not merely because universities are scattered, but because university routine cannot meet the requirements of the kind of research the business world now needs without damaging the usefulness of the university to its students.

It has also been suggested that the scientific staffs attached to certain Government departments could satisfy this need. But the work, which is needed, cannot be done entirely by the Dominion Government. In many cases investigation can be carried out to the best advantage under one or more of the Provincial Governments, or under Federal and Provincial authorities in cooperation. Moreover it will often happen that the work cannot be completed as a practical and commercial success without calling on the financial and other help of the industries which are concerned. In all such cases the work lies outside the duties of any Government department and should be directed by a body with greater independence and freedom from administrative duties.

Thus in England, in the United States, in Germany, and in Japan, the need for some central bureau of research to synthesize the efforts of its individuals has resulted in the establishment of State Institutions equipped and endowed by public funds, controlled by Parliament only in regard to the amount of funds made available for its yearly work.

It is proposed, therefore, that the Government of Canada should set aside \$500,000 to erect and equip a building at Ottawa to be known as "The National Research Institute," and that it should make an annual grant for the carrying on of research in the public interest.

In addition to this kind of work special confidential studies of commercial problems would be carried out for persons or corporations or trade guilds willing to pay the cost of such studies.

This organization would provide a Bureau of Standards—that is, a Bureau for the making of delicate tests, measurements or analysis of standard articles of Canadian trade—a work for which Canada has now to depend largely on the services of foreigners.

In other words, instead of having to rely on the scattered and unorganized efforts of gallant and public-spirited investigators—instead of having her manufacturers send their money, as happened in at least one case, to a foreign state institute to buy research—Canada would have her own central Bureau of Standards for Research.

Here, laboratories and a library would be maintained for public use and a continuous study of Canadian materials would be carried on.

Here the engineer or chemist might find the last word in common knowledge of a subject and so have a much better taking off place for his own research.

Here would be men who might be employed—at cost—to make experiments for this concern or that, their finding in such cases becoming the property of the man or firm or group of firms who paid the cost.

Here the finest instruments and apparatus would be available for those who desired to send their experts to explore some branch of knowledge.

Here, in other words, the State would provide at cost, a common working place and a common repository of such new scientific knowledge as had been acquired at public expense. At the same time, secret discoveries made at the expense of private enterprise, would remain the property of their discoverers—so long as used in the public interest—the public at large benefiting by the stimulus to industry and employment which, in theory at least, follows the application of such private knowledge.

This is what has been done in foreign countries. This is what the Council of Scientific and Industrial Research believes should be done in Canada. And, after all, is this not one of Canada's needs which must be met if this Dominion is to take and hold its rightful place among the enterprising and progressive nations within the League of Nations?

The first Portuguese ship reached Japan in 1542.

Trials of Wireless Experts

Radio Operators Still Bothered By "Vagrant" Signals

Despite the most diligent research, experts are not yet able to say whence the mysterious "vagrant" signals come that every day, and particularly at night, are received on wireless aorials.

"From the earliest days of long distance wireless telegraphy, the difficulties in reception due to vagrant or natural electric waves and atmospheric electric discharges passing down the receiving aerial have been the bane of the wireless telegraphist," Professor John Ambrose Fleming, of London University, told the Royal Society of Arts. He said:

"Having regard to the fact that the positive atmospheric electric potential gradient of the earth increases at the rate of about 100 volts per meter of ascent, roughly speaking, it is not surprising that aorials several hundred feet high may be traversed by quite large currents due to this cause alone, which may utterly swamp the feeble signal currents."

Professor Fleming is the inventor of the thermionic valve-receiver, which revolutionized wireless telegraphy and telephony.

BARELY LIVED THROUGH IT

A terrible experience had Edw. J. O'Connor, of Sault Ste. Marie, from boyhood he writes: "I have been a constant sufferer from Asthma and Catarrh. My nose and throat have often stopped up, and I had disagreeable droppings from my throat. When an attack of coughing came on, it seemed as if I would barely live through it. I would gasp for breath. Catarrh made me well. It's soothing healing action exactly suited to my case." To those who suffer from Catarrh, Asthma, Throat Irritation and Bronchitis, Catarrh is highly recommended. Two months treatment, one dollar; smaller sizes, 25c and 50c, at all dealers or The Catarrh Co., Montreal.

Blamed for Cattle Disease

Trouble Said to Have Originated Among Irish Cattle

The new outbreak of foot and mouth disease in England is said to have originated among Irish cattle, and have led to an embargo on English cattle by some Scottish countries. English papers are re-echoing their demand for the removal of the embargo against Canadian cattle. Col. Mullings, of Winnipeg, who is now in England to ascertain the market conditions for Canadian cattle on behalf of the Winnipeg Livestock Exchange, reports that one Liverpool firm handled ten thousand Canadian cattle last summer with a loss of only a fraction of one per cent.

The Druggists All Agree That "Putnam's" Is Best

The oldest corn remover on the market is Putnam's Corn Extractor—and it is the best. Your corns will all drop out after a few treatments with this painless remedy. Failure impossible. Refuse a substitute for "Putnam's." 25c everywhere.

The unclaimed baggage left on the hands of American railways each year would make a mountain if piled up.

WEAK HEART NERVES BADLY SHATTERED

Many a woman who should be strong and healthy, full of life and energy is bound by the shackles of ill-health.

Some disease or constitutional disturbance has left its mark in the form of a weak heart, shattered nerves, impoverished blood and an exhausted condition of the whole system.

MILBURN'S HEART AND NERVE PILLS

They will find a remedy that will supply food for the exhausted nerves, one that will strengthen and regulate the weak heart and invigorate the whole system.

Mrs. W. W. Pearce, 14 Seaton St., Toronto, Ont., writes: "I was left with a weak heart and in a run down condition from the 'flu.' My nerves were badly shattered, and I had such pains around my heart I could not sleep much at night. I took several doctors' medicines without getting any better. My husband got me to try Milburn's Heart and Nerve Pills, and after I took one box I got relief, and after taking six boxes I have been well and not bothered since."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Will Praise Tanlac As Long As He Lives States Henry Stone

"I will have a good word for Tanlac as long as I live," said Henry Stone, 679 Hargrave St., Winnipeg, in relating his experience with the medicine.

"Stomach trouble had me in awful bad shape the past two years and I was so weak and run down I was just about 'all in.' Every mouthful I ate seemed to sour and the bloating, palpitation and shortness of breath that followed was almost unbearable. I had splitting headaches and attacks of dizziness. I spent quite a sum of money trying to find relief, but was getting worse all the time, and it was only through sheer grit that I managed to stick to my work."

"But my troubles are a thing of the past now, and I am feeling fine in every way, for Tanlac has put me in the best of health. The medicine helped me from the very start and six bottles did the work completely. I haven't an ailment of any kind, and I think Tanlac is the greatest medicine on earth."

Tanlac is sold by all good druggists.

Justice Slow But Sure

Italian Government Clerk Receives Award After Twenty Years

That the course of justice is slow but sure must be the reflection of a certain Italian government clerk. Twenty years ago he was dismissed from the Italian postal service, accused of stealing a postal order that had disappeared in the office at Aquila. Recently a clerk was tying up the safe and there he found a yellow postal note for a considerable sum. An old man, who had been in the service for more than a quarter of a century, remembered that a clerk had been charged with stealing an order and dismissed. An investigation followed, and the innocent victim of the blunder was finally discovered. The government, according to the New York Tribune awarded him the handsome sum of \$20,000—the total amount of salary he would have received had he not been discharged.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are changeable—some bright, the next one cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or gripes. To keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds, and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Motor Cars In West

Of a total of 400,000 motor cars in commission in Canada 156,654 are located in the western provinces. In Manitoba there are 34,814; in Saskatchewan, 68,235; in Alberta, 36,515; and in British Columbia, 26,500.

Relieves Asthma at Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is a reliable remedy for asthma. Your dealer can supply you.

Production in Canada

Products of All Kind for the Dominion Reach High Figure

The value of Canadian products of all kinds for the year 1920 reached a grand total of \$5,716,247,141, according to a report prepared by the Dominion Bureau of Statistics. Of this total agriculture contributed \$1,940,000,000, made up as follows: Field crops \$1,455,244,000, farm animals \$140,083,000, wool \$5,321,000, dairy products \$250,000,000, fruits and vegetables \$40,000,000, and poultry and eggs \$50,000,000. The total for general manufactures is placed at \$3,264,391,594.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

Gift For Princess Mary

The wedding remembrance for H.H. Princess Mary from the Girl Guides of Canada, is a beautifully modelled reproduction of the Canadian Girl Guide crest.

Each Guide in Canada was asked to contribute one cent toward this souvenir.

Minard's Liniment for Colds, Etc.

Football Played On Horseback

Chief Amusement of Men in Mountains Near Turkestan

A kind of football game played on horseback is the chief amusement of the Kelgis, or people who live in the Pamir Mountains near Chinese Turkestan, says Miss Ella Sykes, a well-known English traveller who recently visited that region.

It is a man's game and the football is made by inflating the skin of a goat. The women find their greatest pleasure in attending funeral feasts.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

Ice cream made of goat's milk and flavored with rose leaves is a favorite delicacy of the people of Greece and Crete.

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. C. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Some people seem to think they can get peace prices and war time wages.—Flint Journal.

Minard's Liniment for Garget in Cows

Couldn't Understand It Mother.—No Bobby, for the third time I tell you you cannot have a nickel.

Bobby (in despair).—I don't see where pa gets the idea that you're always changing your mind.

KIDNEY TROUBLE? The Kidneys are the Blood Filters—When they Weaken and Stop Up, the System Becomes Overloaded

With the Anuric Tablets. Niagara Falls, Ont.—"I have used nearly all of Dr. Pierce's medicines and take great pleasure in giving the Anuric Tablets as a recommendation to those who are suffering with kidney trouble and are rejected by different insurance companies. Today I am holding three good policies. All I ask the readers of this is to give the Anuric Tablets a trial, and become a life user in the future."—William Dempsey, 32 Bridge St.

ask the readers of this is to give the Anuric Tablets a trial, and become a life user in the future."—William Dempsey, 32 Bridge St.

HEALTH IS YOUR MOST VALUABLE ASSET

Montreal, Que.—"I cannot praise Dr. Pierce's Anuric enough for what it has done for me. For three months I was under the doctor's care and got no better. I was always complaining of my kidneys. Finally I made up my mind to try Dr. Pierce's Anuric Tablets. I took two packages and don't complain any more. I have gained in weight and am still gaining. My appetite is great and sleep has come to me. That is what the Anuric Tablets have done for me. I truly recommend them to those who are suffering from kidney ailments the way I did. They are mighty good, though not expensive; easy to take, but hard to beat."

—T. A. Brown, 415 Dorchester St. W. Ask your nearest druggist for Anuric in tablet form, or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ontario, for trial pkg. and write for free medical advice.

Each Guide in Canada was asked to contribute one cent toward this souvenir.

The Vacant Spaces Of Canada Offer Permanent Homes For Thousands

The man who truly owns a home is the farmer whose every activity radiates from his habitation. From his house, shabby or pretentious, he surveys the broad acres about him in that sweet knowledge of absolute possession, in the realization that the fruitful land is his for all time and can never be taken from him. There is a satisfaction in owning a farm, apart from the palpable pleasures of revenue, which nothing else in life exactly imparts—every operation and improvement reacts to the owner's benefit and aggrandizement. Nearly all landless city men experience this vision at one time or another, but not all have the courage or the ability to follow it into reality.

Canada is one of the few countries remaining at the present stage which offers opportunities to men of all ranks, even those of little worldly wealth, to establish permanent homes to be theirs and their posterity's for all time. Pre-eminently Canada is a land of homes and a land of vacant spaces waiting for further homes. Here the landless, for nothing or the proverbial song, may secure rich virgin lands of extensive acreage which they need not leave until their mortal days are ended. Here the city dweller tired of the perpetual daily grind, of the monotonous, visionless prospect, of the weekly wage which must stretch to cover so many expenditures, can, with little capital, arrive at his dreams of the out-of-doors with work that holds a change in its every day, to live on nature's bounties without rent to pay, and expenditures and taxes minimized.

Thousands have effected it. Each year thousands of others who never knew the real meaning of home are finding its true significance on the Canadian expanse. Canadian farmers comprise men of all stations, all ranks, all trades and professions, as many men from the cities spent their youth on the farm. The lure of the land has seized them, the desire of a home has drawn them to the country which has so many homes to offer them.

Canada has satisfied them in furnishing the security they sought of a permanent haven for life, a piece of the earth to be theirs for all time, truly an ancestral dwelling, in its most comprehensive sense—Home.

Simple Ice Storage

Every Country Home Should Have Its Own Supply of Ice

Much waste in food products, more especially in connection with dairy farming, could be saved during the summer months if the simple instructions for storing ice which are described in Pamphlet No. 2, New Series, of the Department of Agriculture, Ottawa, were generally adopted. Besides this, foods and drinks would be more palatable if every country home had its own supply of ice. As the pamphlet points out, a very simple storage is necessary; any unoccupied corner of a shed will serve the purpose.

A rough board enclosure—10 feet square and 8 feet high will hold enough ice to provide fifty pounds per day for 130 days after allowing for a reasonable amount of wastage. Poles, even, may be driven into the ground and lined up on the inside with rough lumber or slabs, leaving a space of about three-eighths of an inch between the boards of the wall and the enclosure covered with a roof to keep out the rain. It is necessary to provide free drainage. About a foot of sawdust should be placed on the floor. A space of one foot should be left between the ice and the wall to be filled with sawdust. When the chunks between the blocks have been filled with crushed ice and the whole frozen together, the ice should be covered with about the same thickness of sawdust as is needed for the sides. The dryer the sawdust the better the ice will keep. The pamphlet also describes an ice well and shows plans for the construction of ice houses.

Need For Washing

"Willie," said the infant's mother, agitated by the sudden appearance of a rich relative, "kiss your Uncle John and then go and wash your face at once."

W. N. U. 1407

Advantages of Seed Inoculation

Experience Proves that Application of Nitro-Culture to Seed of Legumes Means Increased Yields

That inoculation with nitro-culture is beneficial to leguminous crops has long been known, but at the same time the treatment has not been applied to the extent that it might be and perhaps should be. From the farming point of view the legume family in Canada, may be narrowed down to the following groups: Clover group including red, crimson, white, zigzag or alsike; alfalfa group, including alfalfa, medick and sweet clovers, white or yellow; pea, group, namely, garden and Canada field pea, vetch and sweet pea; bean group, namely garden and scarlet-runner beans. Dominion and provincial institutions and individual farmers are supplied free with bottles containing the nitro-culture by the Division of Botany of the Central Experimental Farm, at Ottawa. Individual farmers, it might be mentioned, are limited to three bottles, each of which contains sufficient bacteria to inoculate a bushel of seed (60 pounds) of the variety the farmer desires to treat and which he must specify in his application. The bottle will be found to contain a jelly-like substance that contains millions of bacteria that transferred to the seed, supply increased vitality and additional productiveness, besides enabling the plant to store in its roots nitrogen taken from the air, thus increasing soil fertility. That beneficial results ensue is testified to illustration stations in various provinces. One farm superintendent reports that "Some very striking evidence is coming to light of the advantages of artificial inoculation of legumes. In adverse seasons it seems to make all the difference between fair success and dismal failure. In the present dry season we had a plot of alfalfa, the seed for which was inoculated with nitro-culture last year, which has cut over a ton and a half of cured hay per acre. In fact the legumes are yielding roughly twice as much hay as the most productive grasses. This is a complete reversal of previous experience and we can attribute the change to no influence but inoculation."

Curious Methods Of Marketing Dairy Produce

Novel System of Selling and Buying in Vogue in Holland

The organized marketing of dairy produce dates back further in Holland than perhaps in any other country in the world. For more than two hundred years rather a novel system of selling cheese has been in existence in some markets of that country. The cheese are brought from the factories or the farms, as the case may be, and arranged in heaps on the market square. Buyers and sellers come together and dicker over the price. A sale is consummated by the two parties striking the open palms of their hands together.

The modern method of selling in that country was described by Mr. J. A. Ruddick, dairy and cold storage commissioner, at the annual meeting of the Western Ontario Dairymen's Association this year. Sellers bring their produce to the market and register in somewhat of the manner in which butter and cheese are registered on boards in this country. The different lots are put up and auctioned. There is exposed before the buyers a large dial with a wide range of prices marked on the circumference. The pointer, which is operated by electricity, is set at the high point and, when started, slowly descends the scale. Each buyer has an electric button which he can operate unseen by any of his neighbors. When the pointer falls opposite the price which any buyer is willing to pay, he presses the button, the pointer stops and his number is indicated to the clerk and the sale is recorded. The apparatus is so arranged that no two buyers can register at the same time, and the identity of the purchaser is not disclosed for the time being. Lots are put up one by one in this way and disposed of until the day's operations cease.

German Climber Has Marvelous Escape

Carried Over Precipice by Avalanche But Escaped Unhurt

Two German expert skiers, Professor Schork and a friend, while making an ascent of Mount Sulzkoel, in the Tyrol were struck and carried away by a terrific avalanche.

The professor was engulfed, but his friend seemed to ride on the avalanche and escaped unhurt, though carried over a 1,000-foot precipice. He descended into the valley, and with the help of guides set out to search for the body of the professor. After three days' tramping in deep snow they were forced to return.

The Swiss Alpine Club has issued a warning to skiers and climbers to the effect that most of the snow bridges in the Alps, usually safe, are now treacherous owing to last summer's drought and the heavy melting of the glacier ice.

Much snow has fallen on the Alpine resorts.

German War Criminal Escapes

Ludwig Dittmar, whom the Leipzig supreme court recently to four years' imprisonment for the sinking of the hospital ship, Llandovery Castle, during the war, has escaped from the prison at Nuremberg. A reward of 50,000 marks has been offered for his recapture.

Grain Yields Of The Prairie Provinces Show Possibilities Of The West

Newboy Makes Fine Showing

Crippled Calgary Lad Doing Well At Queen's University

Two Calgary boys, David Pasternack and Allen Winspear, who are in their first year at Queen's University, Kingston, made a remarkable fine showing in the Christmas examinations, according to word which has been received by the students' parents. Winspear stood first in Latin and Greek and second in chemistry, while Pasternack was first in English and a number of other subjects.

The student Pasternack is well known in Calgary in view of the fact that for many years he was a newsboy. He lost one of his legs when only a small lad, but in spite of this handicap he saved enough money selling papers to put him through high school and to allow him to attend university.

Roses were formerly the symbol of silence, hence the Latin phrase "sub rosa," meaning "under the rose," and so "in confidence."

No greater or surer indication of the progress of the Canadian West could be found than its consistent annual increase in the amount of land brought under cultivation and the increase in grain production which is a natural consequence. Whilst other countries are battling with the problem of a declining rural population and the flooding of the urban centres, Canada's stretches of fertile agricultural land are slowly being brought under the plough and the country's farming population added to each year by the tide of immigration. Canada, through her splendid wheat crop this year, has risen to second place among the wheat producing countries of the globe, and this is wholly attributable to the increase of settlement and cultivation in the western provinces, the development of which is fast extending northward.

The figures for the grain yields of the prairie provinces for the season under the prairie provinces for the 1921 have been made public, and the expectation of the increase the country looks for annually has been again realized. Substantial increments in the year's production of all cereals maintains for the Canadian West the title of "Granary of the Empire," and indeed, as the provider of wider portions of the globe, warrants aspirations to a yet more ambitious title.

The wheat yield for the provinces of Manitoba, Saskatchewan and Alberta for the year 1921 is returned by the government at 308,925,000 bushels as against 234,138,300 in 1920, or an increase of nearly 32 per cent. In 1919 the yield was 165,544,300 and in 1918, 164,436,100, each year showing a consistent and substantial increase.

The oat yield of the three provinces is recorded as 263,185,000 bushels as against 314,297,000 last year, an increase of more than 16 per cent. The yield in 1919 was 235,590,000 and in 1918, 222,049,500 the same consistency of increase being exhibited.

The barley yield west of Lake Superior to the Rocky Mountains was this year 46,619,000 bushels as compared with 40,760,500 last year or an increase of more than 14 per cent. The harvest of 1919 returned 36,682,000 bushels of barley and that of 1918, which was an exceptional year for this crop, 47,607,400.

The increase in rye production in the west this year is remarkable. The total yield of the three prairie provinces is 23,113,900, which, when compared with the 1920 yield of 8,272,600, records an increase of more than 179 per cent. There were consistent increases in this crop before 1920, the 1919 harvest returning 7,263,000 bushels and the 1918, 5,131,700, and the enormous increase recorded in the past season is due to an increased acreage following an extensive and aggressive propaganda.

Had the wet period during last fall not lowered the grade in many localities, and had the farmers obtained a price for their grain more commensurate with the cost of production, surely this big crop would have brought good times to the west.

Wins Debating Championship

Saskatchewan Defeats Manitoba and Alberta in Inter-University Debate

Winning simultaneously in Saskatoon and Edmonton, in the inter-university debate, the University of Saskatchewan again captures the debating championship of the three prairie provinces. In Saskatoon, Graham Spry and Henry Grant represented the University of Manitoba, C. W. McCool and Miss Marion Massey, the University of Saskatchewan. The latter took the affirmative side of the debate, which was on the subject that Canada should appoint an ambassador to the United States to act as representative in all matters relating directly to Canadian affairs. The judges were Mr. Justice MacLean, Dr. John A. Valens, Rev. W. McPherson, Mrs. J. B. Cleland and Gerald W. Loughby.

Her Choice

"And when we are married, every morsel I'll bring thee violets." "You mean well, but I don't expect all that. Don't bring a grouch to the breakfast table—that is all I ask." Louisville Courier-Journal.

A PRECIOUS TROPHY

Val des Bols, about 35 miles from Buckingham, in Quebec Province, is a celebrated fishing, hunting and trapping district. Mr. J. A. Yarrivie, White Deer Lodge, Val des Bols, last fall had the distinction of shooting a remarkable full grown white deer. How this deer escaped detection, and consequent killing such a long time, while living within rifle range of habitations is hard to understand. He lived on the highest mountain at Val des Bols. A natural background of white birch undoubtedly made him invisible to the hunter who could not get close to him. Once snow fell, his worries were over as he must have become practically invisible on account of his snow-white color. Not a black or colored hair could be found on his body, even the eyes, muzzle and hoofs being either white or pink. Mr. Larivie first saw the deer as a strange or new white patch on the side of the mountain. Upon examination through field glasses he perceived that it was a white deer. He had seen two specimens before, mounted by the owners, and his joy can easily be imagined. He spent about fifteen minutes planning the stalk and studying the mountain in front of him across Green Lake. Mr. Larivie proceeds to tell his story:

"The mountain was negotiated by a chimney or V shaped indentation which I climbed by holding on to shrubbery, cracks, and small projections of rocks, by hand and feet (my rifle—A.22 H.P. Savage, lever action being slung over my back). Reaching the top after an hour and

a quarter climb, I made a wide circle and came back to the edge. I could see the deer laying down amongst the white birch trees, a tangled branchy mass that I knew the small bore rifle was incapable of penetrating, so I decided on again circling. This time I came out at a point where I could not see him, while there was a sheer drop of several hundred feet to be overcome to get within open shooting distance. It took me two more hours to accomplish this noiselessly, especial care having to be taken not to start stones rolling; the dried leaves and small branches were also too much in evidence. I finally secured the position desired only to find Mr. Deer had got up, wandered farther down the mountain side and was laying down again about six hundred feet below me. With my glasses I found that only six or seven inches of his neck, right back of his head, were clear of branches, and the only spot I could get to aim at with a chance of getting the bullet to its mark.

"After I shot him it began to rain. I had to get a boat and then had a terrible job of it to drag him down the last two hundred feet to the boat. He was very large; 14 points in the velvet and weighed 301 lbs. dressed. I was tired and wet, but happy after I got him in the boat. It took me four hours of hard and careful stalking, but he was worth it. Three hours later, after securing help, the deer was hung up in my shed, about half a mile from where I shot him, the last portage being done by the light of my electric torch over a mountain."

Sir James Craig Issues Manifesto On Kidnapping Incident

Belfast.—Sir James Craig, premier of Ulster, issued a manifesto to the people of Northern Ireland declaring the British Government was responsible for the day's kidnapping outrages because of its demobilization of the special constabulary following the Irish truce.

The kidnapping incidents, declared Sir James, would strengthen the Ulstermen's determination that "what Ulster has she holds."

The manifesto follows:

"I have received with grave concern and deep regret news of incursions into the territory of Northern Ireland by armed bands of the Irish republican army. I send deepest sympathy to the relatives of those murdered, and compliment most highly the various constabulary forces who so promptly rose to the occasion and displayed great gallantry to rid our borders of the enemy.

"Had the British Government shown courage this would never have occurred. I place the responsibility on their shoulders for having demobilized the special constabulary in consequence of the truce. I would have returned at once had it not been necessary for me to take prompt and vigorous steps on this side to ensure that such an outrage on the people of Ulster cannot again be perpetrated and that those of our people who were carried across the border are speedily returned to their homes.

"I may be relied upon to back up every individual in whatever steps are considered wise to support our authorities, and have arranged for the immediate distribution of arms necessary to protect our border. Every help will be given, and I reiterate my firm determination, as announced to Mr. Lloyd George, Monday, not to surrender any portion of our territory except with the consent of myself and our Ulster Government.

"This series of dastardly outrages will never be forgotten; it merely strengthens our determination that what Ulster has she holds."

Celebrates 100th Birthday

Rev. T. M. Jeffries of Oakville Began Ministry in 1847

Oakville, Ont.—In the person of Rev. T. M. Jeffries, the town of Oakville can boast of having as a citizen the oldest Methodist preached on the whole American continent and perhaps in the world.

On Feb. 6 Mr. Jeffries was 100 years old.

To have lived under four British sovereigns; to have suffered shipwreck on his way to Canada and to have succeeded runaway slaves who reached Canada, are only a few of the many experiences that have fallen to the lot of this veteran who began his ministry in the backwoods of Upper Canada in 1847.

Germany Makes Third Payment

Paris.—The German Government has made its third payment of 31,000,000 gold marks to the Allied Reparations Commission in accordance with the ten-day payment schedule recently adopted by the commission at Cannes, according to an announcement by the Temps.

JAPAN STOPS WORK ON BATTLE CRUISERS

EIGHT IN COURSE OF CONSTRUCTION WILL BE SCRAPPED

Tokio.—The navy department has formally ordered the various dockyards to stop construction work on the eight battleships and battle cruisers now on the ways which are to be scrapped in accordance with the Washington agreement.

Construction of auxiliary craft set for the year 1921-1925 will be advanced to the present in order to employ employment for the dockyard workers. It is announced by the chief of naval construction, Vice-Admiral Okada.

His Rheumatism Gone He Rejoices

Mr. Mike Karaim Praises Dodd's Kidney Pills

Saskatchewan Man Who Suffered For Two Years Gives the Reason Why He Recommends Dodd's Kidney Pills.

Stoney Lake, Sask.—(Special).—"I suffered for two years from rheumatism but I am glad to tell you I am well again." In these words Mr. Mike Karaim, a respected resident of this place gives the reason why he recommends Dodd's Kidney Pills to all his friends.

"I spent a lot of money on other medicines before I tried Dodd's Kidney Pills," Mr. Karaim continued. "I only used two boxes of them and now I feel fine."

Rheumatism is caused by Uric Acid in the blood. The natural way to treat it is to strengthen the kidneys so they will do their full work and strain all the uric acid out of the blood.

Dodd's Kidney Pills make strong healthy kidneys. Dodd's Kidney Pills have been in use in Canada for more than a quarter of a century. They have grown in popularity year by year because of the work they have done.

Ask your neighbors about Dodd's Kidney Pills.

Pioneer in Fishing Industry

Gloucester, Mass.—Capt. Solomon Jacobs, who is said to have blazed the trail for the fishing industry in the Pacific, died at his home here. He was born in England in 1852.

APPROVAL OF FISHING BOUNTIES

GOVERNOR-IN-COUNCIL HAS PLACED BASIS FOR YEAR

Ottawa.—Approval of the amounts to be paid in fishing bounties during the coming year has been given by the governor-in-council on the following basis: Vessels—Owners of vessels entitled to receive the bounty are to receive \$1 per registered ton, the payment to the owner of any one vessel not to exceed \$50, and vessels' fishermen entitled to receive the bounty shall be paid \$7 each. Boats—Fishermen engaged in fishing from boats who are entitled to receive bounty shall be paid \$5.30 each and the owners of said boats \$1 per boat.

Requires Sanction Of Government

Application Must Be Made for Absorption of Merchants Bank

Ottawa.—Now that the shareholders of the Merchants Bank of Canada have agreed to absorption of their institution by the Bank of Montreal, permission of the government will be necessary before the two banks can be merged. Following the meeting of the Merchants Bank shareholders, application must be made to the government for authority to go on with the undertaking. This application will be dealt with by the treasury board, and permission will be granted if the board sees fit to do so. There is no reason to think that it will be refused in the case of the Merchants Bank and the Bank of Montreal.

Certificates Are Popular in Britain

Sale Since February, 1916, Passes 500 Million Mark

London.—With the sale of nearly two million national savings certificates during the last week of January, the total sale since the first issue of this class of security in February, 1916, exceeds the 500,000,000 mark. This is equivalent to more than 387,500,000 pounds sterling, of which the amount withdrawn approximates £94,000,000. On and after April 1 next the certificates will be sold at 16s. instead of 15s. 6d.

Inferior Work on Theatre

Evidence Submitted at Enquiry Into Washington Disaster

Washington.—A list of 21 "evidences" of work of inferior grade for such an important structure was submitted in an exhaustive report on the collapse of the Knickerbocker Theatre by five army and navy engineers at the coroner's inquest into the disaster. The fall of the theatre's roof caused the loss of 98 lives.

Queen's Gift to Princess Mary
London.—One of the Queen's wedding presents to Princess Mary will be a gorgeously illuminated prayer book which the Princess will use during the marriage service. The prayer book will be specially printed and arranged.

W. N. U. 1407

France Will Ask For Guarantees Before Going To Genoa, Meet

FIRST STEP TOWARD LASTING PEACE

JAPANESE PREMIER'S OPINION OF RESULTS OF WASHINGTON CONFERENCE

Tokio.—The agreements reached at the Washington conference marks the first step toward establishment of a real and lasting peace, with the possibility of abolition of armaments, Premier Baron Takahashi told the House of Peers.

"The Imperial Government does not pretend that the conference was an unqualified success as viewed from an individual standpoint," he said. "It does believe with the other powers that the present agreements are the first step toward realization of a real and lasting peace, and that such agreements will grow in the future even into an understanding for the total abolition of defense equipments."

The premier's utterances came in reply to an interpellation by Baron Sakamoto.

Opinion in both social and industrial circles is that the ten-year naval holiday will prove a decade of peace and prosperity for Japan.

Firemen Sent to Prison

Refused to Work on Government Freighter With Negro

Vancouver.—Twelve firemen who refused to work in the stokehold of the Canadian Government Merchant Marine freighter, Canadian Winner, because a West Indian negro was employed there, were sentenced to four weeks' imprisonment each by two magistrates, in the Admiralty Court.

The men, who pleaded guilty, were punished under the Admiralty Act. Magistrate Prescott pointed out that the ship had been held up three days through the action of the men, incurring demurrage of \$700 a day. When the Winner cleared for the Orient with a new crew the West Indian was working in the stokehold.

Have You Stomach Risings, Gas, Heart Burn, Sourness? Tells of a Simple Remedy

It's really wonderful the quick relief you get from ten or twenty drops of Nerviline taken in sweetened water. For cramps and spasms, Nerviline is equally efficient. To safeguard yourself against these ailments, keep handy on the shelf a bottle of trusty old Nerviline. It will relieve the minor aches and pains of the whole family. Good for internal or external use. 35c at all dealers.

Conference Futile

Premier Smuts Falls to Reach Agreement With Miners

London.—Premier Smuts of the Union of South Africa had another conference in Pretoria with representatives of the gold and coal miners now on strike, with a view to reaching an understanding, but the conference was fruitless, according to a Reuters' despatch from Pretoria.

Fire Loss \$40,000

Calgary.—Fire which broke out in the interior of the McCoubrey and Peterson's store completely destroyed the stock and damaged the Rex rooming house above, causing damage estimated at approximately \$40,000. The origin of the fire has not yet been ascertained. The damage is covered by insurance.

Paris.—Premier Poincaré has reaffirmed the French Government's determination to seek guarantees before going to the International economic conference at Genoa. He made this clear at a secret session of the foreign affairs commission of the chamber of deputies to which he gave complete details of the government's plans and copies of documents.

The Premier said it was France's right and duty before going to Genoa to get the necessary assurances that none of her rights under existing treaties, nor those concerning the League of Nations would be jeopardized. But as to whether French delegates actually would go to the conference or not, he said: "It is not for France to either accept or decline an invitation issued in her name."

London.—It is unlikely that the French Government's request for a three months' delay in the opening of the Genoa conference will be met by Great Britain. It was stated in official circles here.

There are no objections to a delay of a week or even two weeks, it was said, but so far as Great Britain is concerned the solution of the problems to be considered at the conference would not be benefited by months of preliminary investigation.

Decision of the question of delay, however, obviously rests with the cabinet, which is considering the French proposals regarding the agenda of the conference.

Appeal for Cordial Relations

France and Great Britain Being Put to Test

London.—The Franco-British Association, says Reuters' correspondent in Paris, has issued a long appeal to public opinion on both sides of the English Channel to preserve the entente cordiale between France and Great Britain which, the appeal says, is now going through a test on the result of which hangs the fate and civilization of Europe. It urges the conclusion of a real entente by the signing on a basis of equality of the pact which is now the subject of negotiation between the two countries.

Appoint Regina Woman

Toronto.—Announcement is made of appointment of Miss Jean E. Browne, director of school hygiene of the Saskatchewan Department of Education, to the post of director of the junior section of the Canadian Red Cross Society, with headquarters in Toronto.

Racehorses Cremated

Providence, R.I.—Four valuable racehorses were burned to death and \$60,000 loss was entailed when fire destroyed stables owned by Thomas McGrath of this city, at Hills Grove, near here.

The Liver Is the Road to Health

Note and Comment

Business is a little quiet and things are not moving very briskly around the old burg at present. We've got to admit. But say! You ought to hear how they are crabbin' at other places.

It's the spirit that counts. Slack times come, but they go again. They mustn't be taken as a personal affront, in reality they're just a challenge to an economic duel and if we have sufficient reserves of energy and optimism to throw into the fray, we will win out, hands down.

It isn't the fellow who thinks in terms of day before yesterday that keeps things moving—it's the chap who is grappling with today and has a weather eye on the day after tomorrow.

It doesn't pay to be a pessimist, even though a few people seem to find a certain brand of delight in self pity and gloom.

It's the little old mental attitude that counts.

Keep pluggin' along; there's an open road and blue sky

ahead.

Tomorrow you can step on the accelerator again.

"What would you suggest for our club to read," asks a lady reader. We thought that perhaps some of the husbands of the members could help us out in this problem and asked them: "Tell 'em to read cook books," was the brutal reply.

Some people think that punctuation is not very important. If you have got that idea try to punctuate the following sentence so that it will mean something: "That that is is that that is not is not that that is."

If you cannot figure it out read it thusly: "That that is, is, that that is not, is not. Is not that it? It is."

Co-Operative Church

Rev. E. Davidge B. A.

Services will be held as follows D.V. on the Monitor Mission on Sunday next:

Minor School 12 noon
Tons School 3 p.m.

WORLD HAPPENINGS BRIEFLY TOLD

For the purpose of aiding in the detection of crime, the city council has adopted a resolution favoring the use of police dogs in Montreal.

Gilles Grafström, Swedish skater, won the world's amateur figure skating championship by defeating Kachler Bockle of Austria.

Reuter's correspondent cables from Melbourne, Australia, that it is expected tariff reciprocity agreements will shortly be completed with South Africa, Canada and New Zealand.

The Victoria City Council passed a resolution offering a five dollar reward to elicit employees for every workable idea they can think of to save the city money this year.

Field Marshal Earl Haig has been unanimously elected Chancellor of St. Andrew's University of Scotland in succession to the late Lord Balfour of Dunsburgh.

M. E. Gandhi, the non-co-operationist leader of India, has made a manifesto to Lord Reading, the viceroy, saying he is prepared to abandon his aggressive policy under certain conditions, says a Bombay dispatch to the Exchange Telegraph Company.

When General Higginson, British commander of the Cork district, was returning after superintending the embarkation of the British troops at Queenstown, his automobile was attacked by armed men. General Higginson and his fellow officers repulsed their assailants and gave pursuit.

Galician women have expressed their willingness to collect gold, silver and jewellery to be used as a basis for new currency. Forty women's organizations have addressed the Polish Government, volunteering their services in the collection of these gifts to the national treasury.

SAVED HER FROM AN OPERATION

So Thinks Mrs. Tracey of Ontario, Regarding Lydia E. Pinkham's Vegetable Compound

Knightsbridge, Ontario.—"I took Lydia E. Pinkham's Vegetable Compound at the change of life for troubles that women often have. That time I had not been well for a year and was not really able to do any work. A friend who had taken the Vegetable Compound—herself recommended it to me and I think it saved me from an operation. I highly recommend it to all women who have troubles like mine, and am willing for you to use my testimony."—Mrs. DANIEL J. TRACEY, Knightsbridge, Ontario.

Some female troubles may through neglect reach a stage when an operation is necessary. But the more common ailments are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing symptoms first appear take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles.

W. N. U. 1407

London to Algiers in Single Day

Airplanes Being Built Will Accommodate Sixteen Passengers

Today, if you want to go to Algiers, on the African coast of the Mediterranean, to enjoy the hot winter sunshine and to live among the flowers, you must go by train to Paris, which takes you ten hours, then by train to Marseilles, which takes you 16. At Marseilles you wait until a steamer carries you across to Africa in 24 hours more. Altogether you will hardly do the journey comfortably in less than four days.

Next winter it may be possible to leave London after breakfast and arrive in Algiers in time for coffee and rolls there the next morning. The first stage of the journey will be made by aeroplane. Paris will be reached by lunch-time, and after lunch the flight will be resumed, passengers being due in Marseilles at half-past five in the afternoon.

Then, after dinner, they will step into an airship, which will cross the Mediterranean during the night and land them at nine o'clock, just 24 hours after they left London.

The aeroplanes for this service are being built with seats for 16 passengers, and a kitchen which will keep soup and tea and coffee ready for those who want refreshment.

One of the airships to be used is the North Star, which Germany surrendered to France after the war. Far better that it should be put to peaceful purposes than used as a bomb dropper.

DO YOU FEEL WEAK AND RUN DOWN?

In This Condition a Tonic Medicine is Needed

The condition of being "run down" is one that doctors do not recognize as a disease. But those who are run down in health know that it is not a fancied affliction.

The expression "run down" applied to health means a condition in which the bodily functions are enfeebled. Appetite fails, the digestion is impaired, the nerves are impoverished, the complexion becomes pale or waxy, there is no animation, but rather worry and mental depression. Fatigue is a constant symptom. No particular organ being affected, you must look for relief to the blood. As it circulates through every part of the body, any improvement in the condition of the blood is quickly felt throughout the entire system. In cases of this kind a tonic medicine is what is needed and Dr. Williams' Pink Pills are recognized as a valuable tonic because of their direct action on the blood and through the blood on the nerves giving tone to the system generally and restoring vigor. Where the system is run down the value of the medicine is shown by the statement of Mrs. Gregory, J. Murphy, Lower Ship Harbor East, N.S., who says: "About a year ago I was completely run down. I was so nervous and weak that I could scarcely do my household, and the least exertion left me breathless and tired out. A neighbor advised Dr. Williams' Pink Pills, and so much good did they do me I felt quite like a different woman. I hope some other suffering woman may benefit by my experience."

Dr. Williams' Pink Pills can be had through medicine dealer, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Starting Right

The object lesson of the other new countries established as a result of the war have not been thrown away on the Sinn Feiners. They know the proper procedure as they proved by arranging immediately to borrow a million pounds.—Toronto Mail and Empire.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomson's Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

Joe Jefferson's Placidity

The unflinching poise of mind displayed by Joseph Jefferson, the actor, is illustrated by a story told by Gamaliel Bradford in the "Atlantic". One night the stage curtain, he says, dropped unexpectedly in the midst of a critical scene. Jefferson accepted the situation with perfect calmness. Afterward he inquired the cause of the trouble, and one of the stage hands explained that he had leaned against the button that gave the signal. "Well," said Jefferson, "will you kindly find some other place to lean tomorrow night?"

Zam-Buk
Canada's Greatest Healer

The Wonderful Herbal Balm for Injuries & Skin Diseases. 50c. All Dealers.

Safety plugs have been found in tombs 2000 years old, some of the pins being ten inches long.

Mother! Move Child's Bowels With California Fig Syrup

Hurry mother! Even a sick child loves the "fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Fits His Forts

An American doctor was summoned to the bedside of a child whose complaint entirely baffled him.

"Never mind," he said to the anxious mother, "I'll give the little chap a powder. Then he'll have a fit, and I'm a dab on it."

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Mr. Sophie—Well, Willie, your sister has given herself to me for a Christmas present. What do you think of that?

Willie.—That's what she did for Mr. Barker last year, and he gave her back before Easter. I expect you'll do the same.

Dyed Faded Sweater, Skirt, Draperies In Diamond Dyes

Every "Diamond Dyes" package tells how to dye or tint any worn, faded garment with a new rich color that will not streak, spot, fade or run. Perfect home dyeing is guaranteed with Diamond Dyes even if you have never dyed before. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, sweaters, stockings, draperies, hangings, everything!

Rats are found in every part of the world, except the Polar regions.

Minard's Liniment for Distemper

A 20 per cent carbon monoxide in the air will cause unconsciousness.

"COLD IN THE HEAD"

Is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the system and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Whitefish in Northern Saskatchewan

Four cars of whitefish, totalling 120,000 pounds weight arrived at Edmonton recently. This product is caught in Peter's Pond Lake across the Saskatchewan border and hauled on sleighs to the nearest railway point.

Those Having Sick Animals SHOULD USE

MINARD'S LINIMENT
"KING OF PAIN"

Good for all throat and chest diseases, Distemper, Croup, Whooping Cough, Colic, Mange, Sprains, Running Sores, etc., etc. Beware of cheap imitations. The name is sold EVERYWHERE.

Blue Cloth and Gray Squirrel Combined

By Marie Belmont

Coats and suits make popular the combination of blue cloth and squirrel, and seldom are two more effective colors used together.

This suit, with its straight box coat is of navy blue turtleneck. Its large pockets and sleeves are stitched in blue and blended in gray squirrel. The close-fitting chin collar adds a youthful touch in its ties of navy satin ribbon.

Blue or gray may be the predominating note in a crepe de chine or cotton blouse worn under the coat. A blouse of tie-around style is smart, and effectively tops the suit skirt.

DID PAIN DISTURB YOUR SLEEP?

THE pain and torture of rheumatism can be quickly relieved by an application of Sloan's Liniment. It brings warmth, ease and comfort and lets you sleep soundly. Always have a bottle handy and apply when you feel the first twinge. It penetrates without rubbing. It's splendid to take the pain out of tired, aching muscles, sprains and strains, stiff joints, and lame backs. For forty years pain's enemy. Ask your neighbor.

At all druggists—35c, 70c, \$1.40. Made in Canada.

Sloan's Liniment (Pain enemy)

Paper Sound Amplifier

A parchment paper cone serves both as the diaphragm and magnifying horn is a new electrically-operated sound amplifier.

Dr. Chase's ointment

MONEY ORDERS

A Dominion Express Money Order for five dollars costs three cents.

HELP WANTED—FEMALE

WANTED—A NUMBER OF LADIES to color Easter and Birthday Cards, at home; light pleasant work. Send 30 stamp for particulars. Ladies Supply Co., Cumbstock Bldg., Toronto.

THIN, FLAT HAIR

GROWS LONG, THICK

AND ABUNDANT

"Danderine" costs only 35 cents a bottle. One application ends all dandruff, stops itching and falling hair, and, in a few moments, you have doubled the beauty of your hair. It will appear a mass, so soft, lustrous, and easy to do up. But what will please you most will be after a few weeks use, when you see new hair fine and downy at first—yes—but really new hair growing all over the scalp. "Danderine" is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. This delightful, stimulating tonic helps thin, lifeless, faded hair to grow long, thick, heavy and luxuriant.

YOU CAN GET 150 MORE
 FOR A BUSHEL OF WHEAT

That Is What You Can Do Provided You
 Take Advantage of Our Offer

We have made arrangements with the E. H. Heath Co. Limited who publish the CANADIAN POWER FARMER whereby we are able to offer that farm magazine together with our own weekly at the one price for both papers.

The CANADIAN POWER FARMER is Western Canada's biggest farm monthly. It is now in its twentieth year which means that it is thoroughly established throughout the West. It deals with the mechanical side of the farm. Every issue is full of helpful hints and experiences on the operation of all kinds of farm machinery from a washing-machine to a tractor. Its editor has just completed a trip of several months over Western Canada in a motor car for the purpose of studying the mechanical needs of the farmers. He visited the farmers, lived with them and worked with them. The results of his trip will appear during the next twelve months.

This offer may be withdrawn at any time. Without doubt your intention is to renew for this weekly, then why not take advantage now. Your subscription to this weekly together with a year's subscription to THE CANADIAN POWER FARMER for the same price as this weekly alone. This is where you make \$1.50 on a bushel of wheat.

Mail your cheque or drop into our office the first time you are in town.
